Winning Tech's PCS Plus Program

Increase Efficiency +

Solid Foundation

= Long Term Success

What does the program do for your business?

- Assist in developing a corporate standard for software across the entire organization
- Maintain software licensing in compliance with software & copyright laws
- Hardware Standardization Program
- House, maintain & manage your corporate drive images
- Preload your corporate drive image
- Configure each workstation desktop or laptop for individual users
- Maintain Inventory counts on desktops, laptops, cameras, and printers etc...
- Track inventory for your corporate entity by user and location
- Reconfigure each workstation or laptop for individual user so all they have to do is un-box and go to work!
- Increase productivity and lower costs in the deployment of computer(s).
- Provides Asset recovery programs to aid in case of theft, disgruntled employee, termination etc...

How does the program work?

- Winning Technologies will install a secure VPN connection to your business so we can actively be part of your domain and configure equipment for specific users.
- Equipment will be purchased and shipped to Winning Technologies, Inc. where it will be stored in a secure area designated for your business until you request deployment.
- When you need a desktop, laptop or camera etc... place an order with Winning Technologies, the equipment will be pulled out of inventory, configured to your specifications, for the specific user and shipped to the final destination.
- The system information, configuration and user information will be entered into our system and be available to you online through the Winning Technologies helpdesk system.
- Replenishment and inventory levels will be maintained per individual agreement.

What are the costs?

Setup Fees: One time fees
Secure VPN access to your location: \$350.00
Software Licensing: \$700.00
Setup on Server: \$250.00
Total Setup fees: \$1,300.00

Monthly Maintenance fees plus unit cost:

Inventory Management: \$250.00 per month

**Waived for Winning Technologies Maintenance Customers*

- Maintaining Inventory shelf space for equipment stored by Winning Technologies specifically for your business needs and requirements based on established standardization of equipment. If you choose not to have Winning Technologies inventory your equipment but drop ship from hardware provider to Winning Technologies this charge does not apply. However, it may will create a delay in getting new hardware to the end user.

Updating & Maintaining Image:

\$80.00 per Image per month

**Waived for Winning Technologies Maintenance Customers*

Maintain the following items on a monthly basis:

- Confirm Configuration and validate configuration
- Update configuration if needed
- Apply Security patches
- Apply Operating system patches

Reload or Rebuild

- This is for any unit that needs to be reloaded or reconfigured for a new or different user
- Drive image to store the existing user information on the unit when returned to Winning Technologies prior to loading the new drive image.

877-379-8279
